

KLOVE is the best commercial-free Christian station we have around.

We have it on at our house and in our cars. I can also hear it at businesses like gas stations (BP, Citgo and Marathon) and my sister's orthodontist's office. So because you can hear it at so many places people would not like it if it were taken away. When you are down it gets you up, when you are sad, it brightens your day.

If KLOVE were taken off the air people would not have a chance to enjoy commercial-free Christian music.

I have no idea why someone would want to get rid of KLOVE, and replace FM radio with some LPFM set of stations.

It is NOT let me repeat NOT within the public interest to get rid of KLOVE; it helps all listeners with their day.

Because KLOVE is listener-supported it has to have pledge drives. It is doing one right now. People would definitely not like it if they just made a pledge and were ready to support KLOVE, to have it taken off the air days later.

Listener-supported radio is a refreshing change from commercial driven stations and I believe KLOVE should stay on the air.

Thank you for a chance to express my views.
